FQ **FenceQuote** Pro

ESTIMATING & E-SIGN FOR FENCE CONTRACTORS

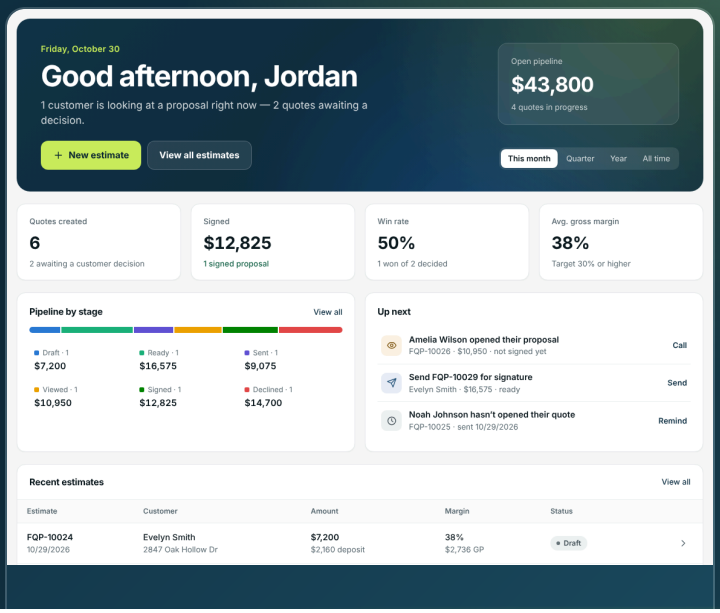

Quote faster. Get signed sooner. Keep your margin.

Price fence jobs from your own price book, send a branded proposal customers sign on their phone, and see what every job earns.

Minutes to a proposal

Any device for signing

Live margin tracking

Everything you need to win the job

Built for owners, managers and sales reps

Fast estimate builder

Add fence runs by the foot, gates and add-ons. Posts, concrete, labor, discounts, tax and deposit are calculated for you.

Built-in e-signature

Send a secure link by email or text. Customers draw or type a signature, with no account needed. Each signature is saved with an audit trail.

Know when they look

See the moment a customer opens a proposal. "Up next" tells you who to call, who to remind and what's ready to send.

Your price book

Set materials, gates and add-ons with your own costs and sell prices. A live margin preview shows the profit before you save.

Margin protection

Set a minimum gross margin. Quotes below it need manager approval, and sales reps never see your costs.

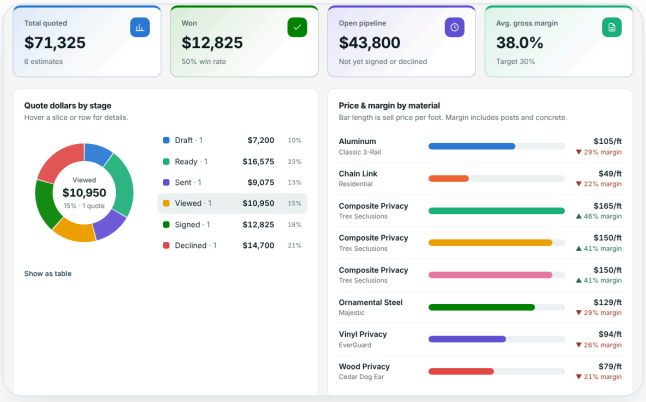

Secure team access

Single sign-on through Cloudflare Access, with owner, manager and sales roles. It runs on Cloudflare's global network.

From driveway to signed deal

1. **Measure & build.** Pick materials from your price book and add gates and extras on site.
2. **Send a branded proposal.** Your logo, line items, terms and deposit go out in one link.
3. **Customer signs online.** They approve or decline with a reason, and you're notified right away.
4. **Track & report.** Follow the pipeline by stage, check win rate and margin, and export to CSV.

Draft | Ready | Sent | Viewed | Signed

Reports: dollars by stage, win rate and margin by material.

FenceQuote Pro

Estimates, proposals and e-signatures for fence companies. Works on desktop, tablet and phone.
